A specific version number (2018 SP2) is displayed for all releases of AutoCAD 2018 Service Pack 2. Aug 24, 2018 Version 2018 . Product features AutoCAD AutoCAD 2018 is a vector graphics/modeling software that also includes standard 2D drafting and plotting tools, as well as an integrated drawing package, a parametric modeling system, 3D modeling tools and a suite of features that improve efficiency in architecture, engineering and construction. New features in AutoCAD 2018 include: • I-Arts 4D is a new 3D architectural application that seamlessly integrates into the 2D/3D software. It presents a comprehensive design tool, including a powerful parametric architectural modeling system, visual styles, surfaces, blocks, templates and the ability to create and manage MEP and Construction Documentation for the building. The entire package can be downloaded and executed locally from a USB-based device. • The ability to download and execute natively in 3D the entire file format of AutoCAD 2009. • A new command called Origination that adds "physical logic" to geometric objects. For example, it is now possible to assign a function of shape creation to a plane or a circle; a door, wall or column can have the closing function, for instance. • New applications, including the Architecture wizard and the Architectural Layout commands that provide easy-to-use tools to create a layout from a 3D model, or to work in full-featured 2D. • The introduction of the Unified Engineering Model (UEM) design environment, aimed at giving users the flexibility to take advantage of both 2D and 3D technology while working in one integrated application. • An improved text import/export workflow through the ability to import directly from Microsoft Word or PowerPoint. • Inline text editing support that gives you the ability to edit existing text on a drawing surface without using the standard "smart text" feature, including direct support for editing over variable text. • A new user interface developed for AutoCAD LT users that gives them a more familiar experience. • New features such as Dynamic Dimensions (display of object properties based on the width of a dimension line), the ability to share model data in cloud services like
