[*13]: NACOR, Norwegian Arthroplasty Register; TM, templating. [*14]: Different methods of fixation are used at the two centres. [*15]: In the two groups of fractures with the highest weight (radius and intertrochanteric fractures) the inclusion was only possible in the radius fracture group, as the difference in outcome of these fractures was too small to be statistically significant. [*16]: The figure in parenthesis is standard error. [*17]: Unstable fixation of the femoral component had an influence on the primary outcome, as did operative revision. [*18]: The figure in parenthesis is standard error. [*19]: The figure in parenthesis is standard error. [*20]: The figure in parenthesis is standard error. [*21]: Indications for operative revision were too diverse for further analysis. I don't know if I can make it over there with the flu. I told my supervisor that I was going to go to Yosemite but didn't get the opportunity. It's a true shame that we can't be on the same team together. I didn't get the G-5 release. I saw a pretty significant edit. They cleaned up a few grammar mistakes, added some more information on how the agreements work, and added a section that made it look like we were going to let the old employees off the hook. Hope you're feeling better. Mollie Cobra and Destinia are the name of the modified Viper Cobra and Viper Strike. In the early '80s, when the American company AM General was already best known for developing the Chevrolet H1 Hummer, this same company was still trying to develop a super-sporty variant of the legendary Cobra. The result was the AM General Cobra and the AM General Destinia, which are basically a reskinned version of the Cobras from the '70s. The Cobra was designed in 1980 and it was the most lightweight American super-truck. The Cobra was developed to be a "work truck" and the vehicle had a bed for carrying cargoes and heavy materials, rather than the normal truck bed. The Cobra also came with a front-mounted loader and 4x4 all-wheel drive. The Cobra was a1d647c40b
