DNSThing Crack+ [Win/Mac] [Updated-2022]

What is DNSThing? DNSThing is a lightweight and easy to understand Java-based application created to offer you the means of testing your network and identifying a variety of problems concerning its running. Basic yet practical appearance The utility features a simple tabbed interface, enabling you to switch between 'DNS Tests', 'Quick Scan' and 'Stress Test' in order to work with the function that you need. The straightforward usage of DNSThing might make it appealing for novices, but it is likely that it will prove more suited for individuals with advanced knowledge in the field. Effortlessly identify, test and troubleshoot network problems From the 'DNS Tests' section of the program, you can ping a specified host or perform a 'NSlookup', identifying its IP address or you can find the available mail servers using the 'MX Rec' function. In addition, the 'Location' component will identify the host's position on the world map along with the corresponding coordinates. Moreover, you can run a 'WhoIs' task using one of the available services to discover several details about the targeted host. The 'Quick Scan' tool enables you to look for ports, looking at the typical ones, but also at an expanded or a user-specified range. DNSThing is capable of performing 'Stress Tests' on a preferred host, allowing you to define the port number and the maximum amount of connections permitted. However, the retrieved data cannot be exported to a file, the best option being to manually copy and paste the information to a document. A useful network testing instrument To summarize, DNSThing is a handy piece of software created for network professionals and other specialists in the field, in order to provide you with a set of tools for testing and troubleshooting various issues. What is iNetArrest? iNetArrest is a professional-grade traffic sniffer for Windows. The program enables you to extract traffic logs from any network adapter and save them as a text file. The large archive of captured logs, provided through a single window, can be easily browsed to find relevant entries. The most important toolset Traditionally, a lot of sources create reports regarding capturing captured network traffic, but iNetArrest takes it one step further by providing a set of more user-friendly, ready

Hi daniel, I have tried to use this application, but it crashes my computer, I can't uninstall it or restart it. Some time ago, all of your apps were free for trial for limited time. But now these apps are paid or free for lifetime. And I found that how long does these apps still work after trial, really surprised. I have a MacBook Pro (15-inch, Mid 2016) with OS X 10.13.6, MacOSX 10.13.5, and I am using the most up-to-date Apple MacOSX can upgrade my computer. Does your other apps still work for unlimited time? And maybe a simple tip would be nice. Thank you very much! °, Name: Email: Input title: Input message: Update 2018: The new version of DNSThing 2022 Crack 4.2.1 upgraded file search function. From release 0.0033, the latest DNSThing 4.2.0 added a new feature "File Search". In fact, the file searching

function is based on file search engine type "Baidu". Also for next release, we want to enhance the speed of file search, currently the searching speed is too slow. Currently the new version of DNSThing 4.1.2 upgraded the OpenSSL library, and mainly updated the embedded version of NetTools & NetIO. New version also added the "File Search" function. But there are still some bugs, please see the attachment to test. Please download the updated version and make sure to completely uninstall the previous version first. May I quote one of your reviews? Hi, I 09e8f5149f
