1. Field of the Invention The present invention relates to an interactive graphical display system using a touch panel (hereinafter, a touch system). More specifically, the present invention relates to an interactive graphical display system for performing a plurality of user's inputs by means of a touch panel.

2. Description of the Related Art Conventionally, an interactive graphical display system comprising an interactive image generator for generating interactive image data and an interactive display for displaying the interactive image data is used. The interactive graphical display system displays the interactive image data that is display-controlled by the display. For example, in a patent document 1 (Japanese Patent Laid-Open No. 2004-207447), a method is disclosed which can coordinate a plurality of points selected by a user on the screen with each other, and can coordinate the corresponding points with a marker or a marker image on the screen. [Patent Document 1] Japanese Patent Laid-Open No. 2004-207447 However, the conventional interactive graphical display system cannot coordinate a plurality of selected points on the screen with each other unless those selected points are arranged on the surface of the screen. Therefore, if user's desired points are not arranged on the surface of the screen, user's desired points cannot be coordinated with each other.

When I click 'Save' it saves the folder but still says "Cannot update file". A: I would recommend to download the latest Orcad version 9.3 from Orcad Support site If you have previous version of Orcad installed, make sure to delete the Orcad folder from Program Files\Autodesk\Orcad Re: Why would you want to downgrade to an older FZ2/8? As an old FZ2 owner who used to prefer the more stable 8, I find 7 just as stable, if not more than 8. The only drawback is that it doesn't have the Z-40 amp, so you can't crank your amp very hard. With FZ2, you can drive it hard without worrying too much about the amp dying. Re: Why would you want to downgrade to an older FZ2/8? In my personal case the reason I bought an FZ2 is that I have accumulated a significant number of old and obsolete pedals. The FZ2 is very light and I could easily hold and pedal it myself, so my very minimal technical skills are sufficient to use it on stage. I also get great enjoyment from it's simplicity and its excellent sound and responsiveness. I don't think I would have any of these pedals if I had got a FZ8, it would be an old and obsolete "style" pedal. It's a much different pedal. Re: Why would you want to downgrade to an older FZ2/8? I had always read that the Z40 is a bit more accurate with clean power sounds, but I guess it's less harsh than the 8. Re: Why would you want to downgrade to an older FZ2/8? Originally 3da54e8ca3
