MenuMagic Crack Free Download [Mac/Win] 2022

[Download]

1. Interface: You can build your recipe collection in real time in the database or import your entire collection as CSV files. You can search for recipes and filter by categories, ingredients, ingredients quantities, expiration dates, allergies and health concerns, printing labels, and conversion factors. 2. Database: Recipe information including ingredients, recipes, service recipes, conversion factors and more is imported automatically from Aperture, Magic Chef, ProSelect and FoodService Directors. You can also store your own recipes and easily edit and update existing data. 3. Personalization: It's easy to create and save customer menus, food labels, menu templates, email templates, and send

brochures and newsletters to customers. 4. Recipe Costing: Each recipe is assigned an expense value for easy setup. It also supports nutritional analysis and you can quickly calculate nutrition costs. 5. Backup & Export: You can export your recipes in several formats such as PDF, PNG, TXT, CSV, HTML, Excel, RTF, Word, etc. 6. Technical Support: We offer unlimited technical support and development for free upgrades at your request. 7. Customer Management: It's intuitive and easy to manage clients, prepare orders and menu or marketing documents. 8. App Store: It is now available in the Google Play Store for Android users! 9. Event management: You can manage multiple events with your clients and keep them updated with food labels, expenses, and other information. 10. Integrates: It can connect to all other

products in the BestSeller Apps platform. Organize your work. Keep a clean work area, and be organized with SpacePlanner. SpacePlanner is the first portable portable digital map of the office. This app allows you to place business items on a map and have them instantly become searchable and built-in to the app. Items can be buildings, walls, tables, desks, desks, chairs, desks, and even chairs if you want. You can then find items on the map. You can create objects, add landmarks and information about them, and link them together to build a space planner. You can store your own items in your SpacePlanner directory or you can use any of the built-in items. You can search for items, or search for them by clicking on them and having a list of items with information about them come up. You can add a location, which will open a map of the

location and add the location to the SpacePlan
