Hey guys,I am new to this site and I must say that I am really impressed at the information I have found here. I am looking for a reliable mail client with full support for Mozilla Firefox and Microsoft Internet Explorer.I dont have the money to spend on an integrated solution like The Bat! Explorer, and I'm not willing to build from scratch. Does anyone know of another solution that is safe, and not open source?Here's some of the features I am looking for:* Allows me to view, search through and sort my email* Browse through folders* Download attachment* Display message source* Supports Mozilla Firefox and Microsoft Internet Explorer* Supports POP3 and IMAP* Supports Microsoft Outlook* Have a built-in address book* Has an integrated RSS feed reader* Has spell check* Has GPG support* Has Thunderbird instructions* Has a built in mail filterWhat email client is this? I am having trouble finding it.I hope I have asked a simple enough question. I would appreciate it if any of you could point me in the right direction. Toast is a free and open source email client for Windows, developed in C# using the.NET framework and the open-source Mono project. It has support for most POP 09e8f5149f
