Returning to the new version of the TriDef 3D 4.5 software, it appears that it now supports over 460 games (430 DDD game profiles and over 30 user-submitted profiles) or ... (64 games supported in the new version). As with previous versions, support for TriDef 3D 4.5 games is enabled by default. Simply remove TriDef 3D from your system and download the latest version via TriDefPack. You can also enable support for TriDef 3D 4.5 games by default by doing the following: How to enable support for TriDef 3D 4.5 games by default? To do this, you need to follow a few simple steps that you probably already did in past versions of TriDef 3D.
