Right click on this on your computer and click Run as Administrator. When this is done, right click VCDS-Lite and click Repair Is there a program available to check for potential problems like performance issues? (Might be a windows update, or something like that)? I have tried searching online, but to no avail. I would prefer not to reinstall either or I already have too many things going on with my computer (I'm on a dual screen setup) All of the above as well as the simply fact that you are downloading programs that may use up some of the 150gb in your harddrive. Another thing to consider is that it may be filling your "C" drive with temp files & backup files. The reason we do not recommend this method for normal purposes is that you are downloading programs (that you are not using) and downloading all of the updates as well. This can stress your system because it only has so much capacity. It is also, difficult to upgrade to a new version of Windows using the upgrade option. You must first delete the current Windows in order to install a new Windows that is compatible. As of now, there is no such thing as a free upgrade to a new Windows version if you do not want to just fully reinstall the system. There are, however, programs that will check your computer for potential problems and allow you to run the upgrade and testing. We are not familiar with one, however, as the above listed program, is what I would recommend. I think you should consider if your system is really stable enough to accept a major upgrade.The benefits of Windows 8 are beyond my imagination. There's a program called EasyUpdate that'll do a good job of upgrading Win7 to
