TranslateExpert wants to give you the possibility to use your own translations, in an easy way, to translate any text, into and from several languages, into and from any desired language.

TranslateExpert is translation oriented, it is a primary word-to-word and a translation converter. TranslateExpert is a free online tool, that connects your word processor to Microsoft Translator API TranslateExpert is like Google Translate, but it has some additional features. TranslateExpert automatically recognizes a word, that is written in the first line of the first page and formulates a translation to any language, that is currently selected by the user or has the next page selected. However, TranslateExpert can also be used for domain-specific translations. Each domain has its own panel. Domain panels give you access to all of a language's tools, and make translating many words in a short time as easy as possible. An important part of TranslateExpert is the help menu. It shows context-based suggestions and, based on the selected language, provides the correct translation, each time the user types a character. The user interface is flexible enough to let you put your own system together. TranslateExpert is an outstanding tool for professional users. It saves time and increases productivity TranslateExpert is the most powerful online translation tool. TranslateExpert wants to give you the possibility to

WordTris Free Download

This game will test your language skills and learn something new about the English language too. In WordTris vocabulary items pile up to the top and you need to guess what the next word is in order to feed it into the game. Feed in two translations before you are finished and WordTris will reveal the answer. After you have fed in your translations, WordTris will check how many words you have successfully fed in. It is possible to correct the translation in different ways, for example by simply typing the word itself. WordTris is tolerant against typing errors, accepts synonyms and learns new solutions. WordTris is a free language learning game. It was started in 2005 by an enthusiastic (German) student of English and German who wanted to learn English better and was looking for a game to aid the learning process. What's New In?

WordTris is a free language learning word game. In WordTris, vocabulary items pile up to the top. Feed in translations before the game is over. WordTris will test your knowledge and learning advances by automatically discarding easy words and repeating words not guessed. WordTris is tolerant against typing errors, accepts synonyms and learns new solutions. WordTris is fully customizable. You decide how difficult the game is or how many words to use. WordTris is intended for a learner's "cognitive workout" where speed and quantity of vocabulary items are of importance. WordTris has two game modes: * "Quick" game mode: Finish a level in a few minutes. The first to complete 4 levels wins. * "Stress" game mode: Finish a level in an endless time period. The first to complete 7 levels wins. WordTris won the PocketPC Innovation Award in 2001 and the SMSID Grand Prix in 2002. WordTris is free of charge. You can visit www.wordtristudio.com for more information and language games, and you can download it from the Apple AppStore and Android Market. If you like WordTris, you can help us in the development of the next versions by submitting new vocabulary terms or feed new translations. If you have any ideas, comments or suggestions for improvement, please contact me. WordTris Played: To get the game, you need to buy one of the compatible internet cafes listed below: You can download WordTris for free on the AppStore: The Hundred Dots is a free addictive game. The Hundred Dots is a simple game that requires you to drag objects to the center of the screen to move the dots to the left and right. In this version, you have a set of dots that you can drag around the screen and move them to the corners as much as you can. The more dots, the more points you get. While playing the game, you can press the "drag" key on your keyboard to move the dots. But with a delay, the dot will be dropped back. You can change the delay in the
