Description: This application, also known as GMP, is a general-purpose file-compression program for Windows that is designed to have a small resource footprint and to perform well on low-end PCs. GMP's main advantages are that it is highly portable and extremely fast, although the latter is largely because of its features. User reviews: Overall: 5 out of 5 Addictive Overall: 4 out of 5 Very good tool, except for.doc Overall: 4 out of 5 Posted 12 November 2014 for Microsoft Office 2007, Windows 7, and Windows XP Cute little utility Very easy to use - in fact I think that that is the only benefit over the older versions of the program that came with XP. The only issue I had was with the.doc files. I had two that I was using to compare how their file sizes changed. However, as I tried to open them in the program, it said that the files were in a different format. I could not open them to change the file type, or the.doc file could not save a.docx file. I hope that someone else can

System Requirements:

Requires at least a 1.8 GHz processor, 1.5 GB of RAM, at least 10 GB of available hard drive space, a monitor with a resolution of 1280 x 800, and Internet access.
