SolarConvert
Description: SolarConvert is an incredibly versatile application for conversions and image adjustments. However, as a visual image editor, the app is probably not one you would use to write the software code for your next project, but it can be quite useful for a number of purposes. The most basic, and probably most used, feature is its PDF converter. Furthermore, it offers the ability to adjust the following aspects of the generated output: text and layout, columns, text and images, and more. For those more experienced with the app's visual customization features, SolarConvert's editor will be a great asset, enabling you to "trash the image", as well as manipulate the text and layout. In summary,
