Are you bored with the same old-fashioned, boring TV and want to have a better way of enjoying content that is fresh, exciting and with new technological developments? If so, then VAST is the only TV that you would need. VAST will give you the capability to enjoy both traditional TV and internet contents in one single product. VAST is a remote-controlled, IPTV receiver that allows you to watch your favourite TV series and internet contents with the help of an iOS device. VAST comes with two key features that separates it from the regular TV, which are: 1. VAST includes a powerful, revolutionary DVR (Digital Video Recorder) that lets you record and store your favourite TV Series. 2. VAST is bundled with a remote control for your convenience. It is IPTV receiver that can control most of the remote TV application. VAST is set to revolutionize the TV viewing and provides you with a full Internet browsing experience with the help of an innovative mobile TV browser. The main reason why people prefer the internet contents is because it is a more convenient way of viewing contents. It is more entertaining, fun and provides the latest information at a faster speed. The main concern with the regular TV viewing is that we watch it while we are physically sitting in front of the TV screen. With the internet viewing, we get to watch our favourite shows and movies in more comfort, more relaxed, and at our own pace. It's a basic, two-button application that will help those still owning a PC with a DVD drive. The bottom line is it can be useful in a handful of situations, but is otherwise a dull and almost useless piece of software. Two-button, simplistic interface You might dismiss it, thinking there is no possible use for it. One particular scenario for utilizing this could have to do with difficult access to the tray. This application could very easily come to the rescue, especially in the case of an AIO computer where the disc drives have a tendency of being awkwardly placed. Useful but replaceable While this tool works as an override for your disc drive button, it's not unique in any way. Many CD/DVD burning tools or players do incorporate some sort of software-opening mechanism, meaning you won't need one particular application just to execute this simple task. There is the added advantage of portability on this program's side, meaning you could carry it with you on portable storage, salvaging stuck CD/DVD drives. It's quite clear it was designed with older desktop computers in mind, but it will work with any Windows-based machine sporting a disc drive.-bound transcripts on either side of the exon-exon junctions. This is consistent with a model in which a long-range looping interaction occurs between the genomic regions flanking the 5′ UTR and the 3′ UTR of a spliced intron, with the loop being brought to closure and finally sealed by an intronic lariat containing a pseudoexon. FIG. 1. A comparison of the two known sequences of the mouse Col4a5 transcript, the consensus sequence for mouse Col4a5 is shown at the top, the sequence of a portion of the Col4a5 transcript obtained by 5′ RACE, shown at the bottom. The sequence of the last exon, a pseudoexon (boxed), was determined by 5′ RACE. The consensus sequence is shown at the top and the RACE sequence is shown at the bottom. In all four sequences, the vertical bars represent the splice acceptor and donor sites. Two U's in the RACE sequence represent a deletion in the consensus sequence. FIG. 2. A schematic diagram of the alternative splicing of the Col4a5 transcript. The boxed regions in the Col4a5 coding sequence represent the exons, the line above the exons represents the poly
