## PATCHED XLSTAT 2014.5.03 Final Incl. Patch Serial-MPT [ATOM]

PATCHED XLSTAT 2014.5.03 Final Incl. Patch Serial-MPT [ATOM] When run, the application will open a Mysql Database that contains information about the connection to the Database, errors, number of queries and last date of queries. PATCHED XLSTAT 2014.5.03 Final Incl. Patch Serial-MPT [ATOM] ProcessID, ParentProcessID, ThreadID, Time Taken (In Milliseconds) A: From what I can tell, you're trying to count these three things in every file, and then print them in a new row every time the file is altered? If so, then it seems you're never actually counting anything, so I don't think you're running into a race condition. Even though I don't know what you're trying to do with this, it's hard to really understand what you're doing with the code. I can tell you this: If you're using 6.9, change `src = CInt(src)` to `if src == "" or src == '...'` You can clean this up by making sure variables have meaningful names. You're repeating a lot of this. I'd at least be variable names like `xIValues = String.Format(src, @"$( " + IblValues + @")"`). You can change the format string if you'd like, but this is a best practice I'd be looking to maybe do this using Dictionary or a List Also, I'm surprised you're using sourcecontrol. From what I can tell, you can just use `Application.StatusBar Dim iCount As Integer = 0 xIValues = String.Format(src, @"$( " + IblValues + @")"`) For Each file In `fso.GetFolder("E:\example").Files` With `Application.StatusBar .Add("COUNT", iCount) iCount += 1 .Add(file) .Visible = True` End With Next Additional information: `Application.StatusBar` just adds the total number of things to the status bar, not what's gone before. A: You need to understand why you are encountering this error. If you 3da54e8ca3
