It is the result of a long-term development process that started nearly four years ago. The main idea of the application is to help users with text input by typing without keys. You probably know this feature from some popular Windows and Android software, like the AutoIt driver pack, Smartphone App Keyboard, TextExpander and AutoKey. KeyMacro is the only keyboard replacement app that provides more than just text input - you can use it as an advanced learning software. You can record macros (short keys) and export them to TXT files. These files can be used as a learning material and if you would like to use them for some other purpose, you can also convert them to other formats. Please note that a special license is required for some features, such as exporting macros to TXT files. KeyMacro provides: Permanent record of every key stroke (macro) Maintains unlimited number of macros Ability to record macros with different keystrokes Keystroke Timing Detection (KTD) Key history (list of keys and their last used status) Advanced settings like repeatability, delay time, repeat delay, randomization In-app Learning mode with randomization and user settings Different modes of input are supported, including Typing Simultaneous Typing Dictation It is possible to use one of the

supported languages: English (US), English (UK), Spanish, French, German, Italian, Russian, Polish, Hungarian, Czech, Hungarian, Croatian and Bulgarian. KeyMacro is user friendly and is designed for everyone - no matter if you are a beginner or an advanced user. KeyMacro Key Features: An interesting and practical application that works as a keyboard replacement app and has a lot of important features. It is compatible with Windows 98, 2000, ME, XP, Vista, 7, 8, 10, Mac OS X 10.6, 10.7, 10.8 and Mac OS X 10.9. KeyMacro is not a very well known application and 77a5ca646e
