Cp210x Usb To Virtual Serial Converter.exe ^HOT^

I plugged in the Virtual COM Port Adapter (VCP ) Silicon Labs model CP210x USB to UART Bridge to your PC. DL- Windows says "No. In some cases, the model CP210x. USB cannot be identified correctly. Check the drivers and settings on your computer" I tried installing the drivers on Windows 7, but it still didn't work. I also read that UART Bridge for Windows does not work with virtual COM ports. I tried installing VCP drivers on Vista. I have tried various settings but to no avail. What else can I do? I have Windows XP running on a laptop. How do I connect the UART Bridge to my PC?
