I have a table with multiple rows. There is a checkbox on each row of the table. When I click the checkbox and press enter I see all the checkboxes are checked and the row is highlighted. Why is this happening? How can I stop this behavior? To reproduce, you can use the following small example. Create a new project using the "ASP.NET Web Application" template. Then add a "Web Form" designer and put the following code in the.aspx file:
