Left freezer door open for 3 hours.First, a look back at the mistake. In a simple test, a single neuron has been wired to respond to different signals. In this case, a yellow square triggers the neuron to fire. At the same time, the neuron is reading the time of the current signal. When the signal is yellow, the neuron spikes - a moment that only comes along once every thousandth of a second (1 kHz). This single signal is meant to mimic the electrical signal that occurs
