They can also create and animate trees, perform various effects, and create beasts and other equipment. ■Clan Established by the Elden The Elden have long been feared by other races and kingdoms because of their skills in magic and alchemy. They take the name of their clan from the trees that they venerate. ■Clan Doctrine Each of the Elden clans share the same clan doctrine. All three lines of the Odinic Rite are achieved through the same operations. However, they have different beliefs about the world. The Odinic Rite, which is passed on from the great-grandfather, is based on the natural rules of the world. Also, they believe that one can create a powerful body and powerful soul by harnessing their own energy. ■Organization Structure All the Elden are not born as Elden Lords. In order to become an Elden Lord, a person must first inherit the Odinic Rite from their great-grandfather. If a person accepts the Odinic Rite, then they will become a Knight of the Elden, who only has to go through the three lines of the Rite to become an Elder. The Elden are divided into four circles: •Magus Magus is the name given to a special class of humans who can perform magic by harnessing their own body's energy. Also, their body is capable of reflecting magic. They are divided into ten classes based on their magic abilities. Their names are based on the names of the aforementioned ten classes. 1)Thaumaturge Thaumaturge is the name given to a class of Magus who can perform a variety of tricks using the magic power that they have stored in their body and brain. What's New In This Version:

TL,DR: I thought I would post that here so that people can view it better and not have to then go to the steam client to do so.

System Requirements:

I should have a fair bit of these that are commonly accepted.

Windows 7, 8, & 10

- **x64 or x86 (32bit)**
- **19.1 GB RAM**
- **3 GB Video, at least 1280x1024**
- **HDD Space: 1 GB Free**
- **DirectX: Version 11**
- **Minimum 1.5 GB**

I also have a few with "Can't", which is the not optimal configuration, but I will have to figure that out.

:

- **How to get the game:**
- **The game runs fine in a Wi-Fi area with 24-100 people.**
  - **AVOID security patches or you cannot play the game.**
- **Some of the full installs succeed, though lots of them seem to crash right away.**
- **Multidox work fine but kind of score in, though you will need to buy the online map and stats, but the game itself will work fine.**
- **DL on VAC and use it**
- **Problems occur more with not-VACed apps. Not sure if this has to do with VAC or not, though.**
