RUNAWAY in Australia has announced that SEIJABU's Bloodlust: Vampire Hunter will be available for download on the PlayStation Vita on April 4, 2016 for \$14.99 USD.

Bloodlust is set in a fun and creative type-runner game environment, with PvE and PvP side-games, each with a different type of gameplay. In combination with an easy, focused combat system, you can enjoy the various content provided, including the legendary weapons.

You can enjoy the main story, where a strange disease has spread over the world, many of the world's inhabitants are infected by the disease, and hard-working, careful people who are in the service of the community are disappearing one-by-one. It seems like the disease suddenly appeared, but the truth is not quite like that. You are a vampire hunter for hire who is sent to a city named Der Nahelr where an unusual monster appeared. You will be given quite a lot of tasks, and it is a great goal to eliminate the enemies and find out what their connection to the disease is.

It was also brought up that in Japan, the smartphone version has been released. Also, from the following pamphlet, there has been no information in regards to an international release. At this moment, there is no other information.
