Is it limited to two decimal places? A: The data type NUMBER allows for up to 37 decimal digits. If you only intend on storing three decimal places you could use a FLOAT with a scale of +6. For instance: SQL> alter session set nls_scale_float = 6; Session altered. SQL> create table t42 (a number); Table created. SQL> insert into t42 (a) values (123456.6789); 1 row created. SQL> select * from t42; A ----- 123456.7 SQL> More information on NUMBER can be found at Oracle's website: Composite frame A composite frame is a frame consisting of numerous elements, normally wooden and metal, but more recently plastic. Frequently composite frames have panel elements, that may or may not be built into the structure, but are securely attached to the main frame members with screws or bolts. An example of this is a composite deck, which has the decking boards attached to a metal frame. A composite deck is built by assembling the frames together, and then assembling them to the decking boards, or by constructing the deck from the floor upwards. A wooden frame is first constructed to standard building standards, and then the mouldings and trims are laid around the frame, after which steel edges are attached. Trims and mouldings, that should be secured to the frame can be fastened
