FIFA 22 introduces the most significant technical change to the series since its debut on the PS2 — “HyperMotion Technology.” This technology simulates how the ball will behave when in-game during a match. It makes all players seem fast and agile, and all skills seem possible. When the ball is passed around, it makes your players hop and skip around like they are running on a trampoline and the ball bounces higher on contact. Passing is more intuitive as your players always aim to deliver the ball in a direction where they can travel in the most powerful direction. Even when building up the ball, your players have the ball move with precision and rhythm. In celebration of this, we have four new skills for free just for the first week of FIFA 22. New in FIFA 22 is the work of a team led by FIFA game creator, David Rutter. A series of key moments were identified in previous FIFA games, with these moments either never used or used only rarely, such as: 1. Throw-ins, where players made a sudden change in direction. 2. Terrain effects, where features of the pitch had an impact on the player's ability to pass and move the ball. 3. More authentic handling physics and animations. All of these ideas and innovations have been carefully integrated into FIFA 22. Football Manager Handheld is a video game produced by Sports Interactive and published by SEGA Games for a wide range of platforms, the most successful of which include handheld consoles and personal computers running under the Microsoft Windows operating system. History of FIFA The history of the series started in November 1988 with the release of a console title, Inside Edge, developed by Revolution Software and published by Konami for the Master System. This was followed by two arcade titles, World of Pinball and Top Striker, both of which featured a licensed soundtrack. The next title to be released was the Sega Mega Drive / Genesis game Top Spin, which introduced the use of licensed music and the ability to create your own player with a variety of customisable attributes. After this, two more licensed games were released for the Mega Drive / Genesis: Sega Soccer and Sega Superstars. The latter continued the trend of licensed music and allowed you to create your own team, this time of fictional players. The next licensed title was Sega Foosball, published in the UK under the name Foosball Soccer. This was a licensed adaptation of the video game, Foosball, and features local and online multiplayer modes. In 1988, the series saw the release of the first arcade game published by Electronic Arts, titled Winning Eleven (or FIFA in Europe). Like the previous licensed games, this was also developed by Revolution Software, and featured licensed music. The next licensed game was 1991's European Soccer, also released in the US as Winning Eleven (for those countries where the game was licensed under that name). Again, the game featured licensed music and the ability to create your own player. This was followed by a number of licensed titles released on Sega consoles and consoles by SNK, in the forms of Soccer '91, Winning Eleven '92, Winning Eleven '93, Winning Eleven '94 (a.k.a. FIFA Soccer '94), Winning Eleven '95 (a.k.a. FIFA Soccer '95), and a number of arcade titles in the form of World Cup and (non-licensed) Winning Eleven. In 1995, the series saw the release of a number of arcade titles including Winning Eleven 8, World Cup Football 94, and Winning Eleven 8-II. The next two arcade-based titles were Winning Eleven 8-II: Superstar, and World Cup 98. HISTORY SEAGATE SPORTS COMPLETES THE FIFA ACADEMY Head of FIFA International Development, Alessandro Grassi, and FIFA 19 Executive Producer, Andrew Brazier, look back at the remarkable growth of the FIFA Academy since its foundation in 2006. Today, soccer is a global sport with a huge number of players across the world and a huge number of clubs, which are the main operators of the sport. As a result of this sport's attractiveness, many youngsters now take to the field as footballers, believing in the values of the game, having the strength to learn from their mistakes, having the strength to face all the difficulties of this sport, which represent a passion and a dream. Of course, youngsters who become footballers are not unique. But they are a unique group of people because they have the opportunity to represent the best clubs and countries in the world and thus, they become role models for all the young people of the world. We have had a passion for football, and we were fortunate to have had an opportunity to work with incredible and unique people. But of course, this feeling of passion and obligation to improve the lives of the next generation of players existed long before. Thanks to the FIFA Academy, we have been
