“There was a clear need to bring our gameplay to the next level of fidelity, and Fifa 22 Free Download is, by any measure, our best offering yet,” said Peter Moore, executive vice president and chief revenue officer for EA. “We are indebted to our community for inspiring us with new ways to make FIFA better and we couldn’t be more excited for them to experience our new direction for gameplay as soon as possible.” To demonstrate FIFA 22’s improved flexibility and responsiveness to player and ball behaviors, EA is sharing in-depth gameplay and technical data as well as video content to share with fans. As a bonus, fans will have early access to FIFA 22 content on the EA Access Vault beginning with the worldwide launch on PlayStation 4 and Xbox One. Content planned for the first wave of FIFA 22 content includes the following: Technical Updates: • “Constant Contact” – With the goal of responding more naturally to your touch on the ball and anticipating your play, FIFA 22 now features “Constant Contact.” The new control scheme uses real-time physics to allow you to actually touch the ball with your hand and the game to more accurately estimate where you are going to be touching it. Constant Contact also allows for a more fluid response to the ball being kicked in high-risk areas to discourage players from resorting to risky and uncomfortable one-footed play. • First Touch – When receiving a pass, players now have an enhanced first touch to bring awareness to the control you are receiving the ball with. The timing is also improved to react more naturally to the type of pass received. • Zones – The all-new “zones” system further reduces the aggressive, aggressive play that has been a hallmark of FIFA across the series. As a pass arrives in a zone, the player has the ability to stop their run and create a more agile on-ball outlet pass. • Touch Control – “Touch Control” will finally allow the player to control the game with their full body, not just their feet, while remaining in possession of the ball. • Interpolation – With over 50 interpolation behaviors, including head-shots, goal kicks and even the ability to over-step the opponent, FIFA 22 will feel more realistic, responsive and fluid in all areas of the pitch. Player Data: • Highlight
