The Gnomelings are pleased to present a new fun game for everyone. Thanks to our good friends at Devolver Digital, we are very proud to present Gnomelings: Migration. Our goal is to produce the best RPG ever made in the Gnomeland. (We know what you're thinking, but we were just kidding.) By the way, Gnomelings is not just about good looks and a low-poly styled game, it features a deep, character-driven story, with NPC interaction, diplomacy, and the possibility of multiple endings. Key Features: An immersive and visual experience influenced by iconic 2D video games. An epic tale of misfit monsters seeking their rightful place. Character-driven dialogue system with a variety of random encounters. Endless hours of gameplay with no "level cap" to reach. Authentic art style influenced by video games of the past. Possibility of multiple endings. Improved random encounters, more possible actions, and more events. By bringing it to life, and by doing it ourselves, we hope to offer a truly unique game experience. Add in some brutal combat and a sarcastic sense of humor, and you're in for a treat! About This Content Add in some brutal combat and a sarcastic sense of humor, and you're in for a treat! *Gameplay* Take your place as the first Gnomelings. That's what we call a fresh start for a monster. Your goal is to survive and if possible, to prosper. Your tasks will be complicated by the fact that other monsters have already arrived and many have gone to an early demise. If you have more to say than simple Hi and Goodbye, there is plenty of opportunity to earn the admiration of others. Don't be scared to be yourself and embrace your own unique persona. Remember, you are the first Gnomelings, and the first one to be the last! The story The story of Gnomelings is about a small colony of monsters, the Gnomelings, who wander the land in search of their place in the world. Our hero, "James", is the first to be chosen by the Great Father, so it's not surprising that he, as the first Gnomeling, ends up being the last. He'll eventually find the rest of his colony and set out in search of a new place. What he finds is a land full of people - people he doesn't know. And, not to be insensitive,

 -buddy: Unbot 5.0 I've been using a VR-buddy since last Christmas, but I rarely took the time to look at the stats. Today I want to show the current trend lines. In my head, I have some general ideas about where to head. But most importantly, I want you to create your own scenario with your own trendlines. (Aside: what's with the "want"? I think I'm in love again… and you might be too if you see my headshot, but seriously, I'm pretty sure you do not want to get in a long distance relationship with me… yet.) This will be fun: apply the trendlines at the start of this and check back after a few days Goals for the weekend and beyond I need to pimp my blog a little bit too… a lot of interesting articles coming up next. Stay tuned: 1) convert the French "Abattu" to German friends (and check the current french trendline) 2) think out loud and possibly write some stats… 3) improve my blog (and your trendlining adventure ?) 4) learn to use the Google Analytics API. 5) Patreon supporter writes in: how to use a 2Ghz quad port (dummy link) And now, this is the script What have we got here? The robots have figured out that this is a site about VR. And here is the most recent item from their list: But now that there are all these Oculus Rift and Vive things, how about taking a closer look at the way people on the internet are talking about them? While most users of platforms like Facebook or Youtube upload their own content, a true VR storyteller would be seen as a special kind of artist. A lot of VR content has been released, featuring so called VR narratives. And especially in the Oculus platform VR has an establishment. Numerous recent theatrical and VR feature films have won awards, such as the outstanding narrative feature "Damsel", the extraordinary student film "Farm Fresh", the innovative generative films "LIVE", "Be the Alien" or "Vortex", or the outstanding documentary "Henry". Beyond motion, we have a rich world of story

Smash Bash Crash is a 2-4 player vehicle combat game that combines intense vehicle warfare with endless hours of pick-up-and-play arcade gameplay. You'll blast through an infinite number of weapon-packed arenas across three game modes: Capture the Power, Race to the Finish and Ultimate. Each map has a range of vehicles including buggies, sand buggies, tanks and helicopters. The crazy 'weapons' you collect and use are randomly generated by the map, which makes for a truly unique experience. As a result, even though the game is physics-based, there's never a battle that's the same twice. Tackle a variety of game modes including: Race To The Finish – rack up the most points over a range of different map types. Ultimate – the ultimate vehicle showdown. The last one standing takes all glory. Capture The Power – Race for the most number of power-ups before you run out of 'ticks'. Pickup And Play – Grab the most power-ups before your opponents, use the portals to escape enemy fire and enjoy an arcade-like experience with the balance-based gameplay. Play Online! Smash Bash Crash is also the first game to feature Steam's Remote Play Together feature, which lets you play with friends through Steam. Features: Arcade-style vehicle combat with multiple maps and game modes. We're not kidding when we say it's free-to-play. If you like the game, please drop us a like or share. No pay wall. There's no purchase, no barriers or limits. Just fun. There's a dizzying number of weapons and arenas. What's more, they are randomly generated by the map which means that there is always a unique new experience. Challenge your friends online with Steam's remote play together feature or hone your skills against the AI. So what are you waiting for? The battleground is waiting.
