Fishing on the Fly is an indie game designed to challenge a fly fishing guide through 14 skill building chapters. Each chapter unlocks more areas of the river and alternate techniques for fly fishing. Explore different methods to catch fish in the game with angling techniques that you pick up along the way. My review: Review from GameTunnel.com Fishing on the Fly | GameTunnel Fishing on the Fly is an indie game from a fly fishing guide that asks you to catch fish in his accurate models of western rivers. If you love fishing, have dreamed of fishing and you like games, you will not regret to play Fishing on the Fly. It is a unique game that catches true angling, challenges you step by step and you will enjoy the game. If you really need adventure in your life, this is your game. "Fishing on the Fly" is a fly fishing game that is hard to find in the stores. It is an indie game that you can get online. This is a game where you learn without having to study tutorials. You can play Fishing on the Fly online anytime you wish. The game is not just a fishing game, but an adventure that teaches fly fishing and allows you to explore 14 levels of gameplay. You learn in every chapter how to fish the river and that's why this game is hard to find in stores. The game includes several fish species that you can catch as you play through the chapters. The game also features seven different rivers and many realistic environments. The game features a lot of content. You play the game for about an hour and a half if you are an expert and 2 and a half hours if you are an intermediate or beginner. Each chapter unlocks when you complete the previous ones. You progress by selecting different strategies, tactics and equipment. The game is challenging and it becomes more difficult step by step. You can just complete the first part to see the game in its full potential. This is a hardcore game that is hard to find in store and online. One of the reasons for the absence of the game in stores is that Fishing on the Fly is one of the first games developed in the U.S.A. This is one of the few games in the U.S.A. that uses licenses to fish. The author uses great source of information about the real rivers. The creator is an expert fly fisherman and he fished these areas with his expert knowledge.
