As soon as it starts up, it immediately draws your eye. The geometrical patterns that emerge in the music and movie intro's look absolutely gorgeous. My personal highlights are the coloring and movement pattern. As soon as I took a look at it, I knew I had to install it. I run it with Windows 8.1 Pro on an i7 6550U, 16GB of RAM, and a 240GB SSD. It runs great and multitasks without lag. Like all Razer software, it was easy to download and install. My only complaint was I have to manually uninstall and reboot my computer before it would run at the highest settings, otherwise it runs great on 60fps. I'm a huge fan of Razer Software, and will be a fan of this screensaver just as much as Razer Software and Razer Blade. I found this screensaver to be absolutely amazing.
