It is possible to transfer the details in order to save the files onto your PC you can do that as you please.. funny videos 2015 download, jimmy carter vidos, jimmy carter video, download free videos.Q: Is this the correct way to implement a system for a bunch of math problems? I'm currently working on a project for my robotics class that will need to solve a bunch of math problems in order to move an object. I'm using matlab and have run into an issue that the variables that need to be solved for the math problem should be solved for all of the math problems. I am just wondering if this is the correct way to do this kind of programming, and am probably missing something simple. My math solution looks something like this: function [x y d] = karp(p1,p2,p3,kappa) p1 = w1\*p2\*p3/(p1+p2+p3); p2 = w2\*p3/(p1+p2+p3); p3 = w3\*p1/(p1+p2+p3); k = [1 2 1]; kappa = 10^5; d = zeros(3,1); d(1) = (x(2)-p1)/(p2-p1); d(2) = (p2\*p3-kappa\*(p2+p3))/(kappa\*p2\*p3-kappa\*(kappa\*p3+kappa\*p2+kappa\*p1)); d(3) = -((x(1)-p1)/(p1+p2+p3))\*((kappa+1)\*(p2\*p3)/(kappa\*p2\*p3-kappa\*(kappa\*p3+kappa\*p2+kappa\*p1))); The problem with this is that whenever I put in another variable I have to change it for every math problem. Is there any way to use one set of variables and just have them follow the same mathematics for each problem? A: Well, you have two options Just use a loop Put your equations in a function and use the function
