In this program, you'll be able to design and animate a slideshow in just a couple of minutes. The application was developed for children and animation amateurs, in order to provide them with the basic skills needed to create animations and cartoons. It works just like a giant composition board and a lot of drawing tools combined, and everything happens quickly. Simply choose from hundreds of available objects and a quick preview will appear in front of you. If you want to begin right away, then click on the Next page button. Then use the selection tools to create your scene and click the Drawing Tools button to start doingodging. You'll see that each frame is selected by default, which means that they're all linked. To link the objects of each frame, click on one object and drag it to the desired location on the next frame. That's all you have to do. One of the cool things is that you can animate any object without having to pay attention to its size or rotation. You don't have to move the frame to resize it, because it will be "invented" at the moment you drag and drop it. You can even animate the text by dragging it or by clicking on a place that you'd like to place it. Create Animations by Drawing Additionally, it is possible to link any number of objects and even the text. Additionally, you can fill any object with anything you'd like. With the help of TAB Kids, you can create incredible animations and cartoons in just a
