A: No aplicativo, eu identifiquei muitos usuários fazendo a requisição antes que eles façam alguma ação. Nesse caso, a frase mais esperta seria fazer a leitura de cada usuário, comparar os valores e salvar as alterações para os usuários que podem chegar a esse ponto da aplicação. A vantagem de fazer uma requisição de cada usuário é que seus valores estão todos já armazenados no banco de dados, então apenas bastará comparar os dados para validar, assim você não precisa ter acesso ao banco de dados novamente. E como dizem uma amiga da profissão: "Nenhuma pergunta é permitida se ela não
