This game is played on a 3D tabletop, with one player piloting a ship and aiming torpedoes, while the other player commands an army of tanks. You use a steampunk-themed analog controller and place artillery shot markers on the table. All you need is two players, a table and an analog joystick or gamepad. (T)Saba has a space station with a dance pad for each of the four walls. See www.makegameswithmeat.com/blog/tabletop ## **_Tide Wars_** **Platforms:** PC
Program: Xonotic **Website:** www.tidewars.com **Tide Wars:** The history of gaming has been replete with so-called real-time strategy (RTS) games. These are often one-off solo games where you build a base and then use it as a strategic platform for the following levels, but are usually run by a single individual. The most famous of these games is probably Dune II. Then there are the more scientific-based games like Master of Orion, where you are predicting the outcome of the development of your race over a series of generations. Tide Wars is an excellent development of the genre and begins with a base that is available to be improved upon as the game progresses. Screenshots of the base are also available online so that you can see what you've done to it, as well as a stock set of units that are available to enhance the base. The units are based on the units and gear used by the human population, so a human player has a very different set of combat units to a player who chooses to play as an alien race. The updates go live every three weeks, so you can be downloading an update the next time you are playing. It's good practice to keep your computer up to date. And, as with any game, there are bugs. If there are any you find

Now Commenting On: Dodgers to play host to Brewers in 2011 Dodgers to play host to Brewers in 2011 As the Dodgers prepare to celebrate their latest World Series title, they are preparing to host the 2011 Brewers for four games in their next home series. The games, to be played April 9-12, will be played at Busch Stadium. Los Angeles owns a 1 1/2-game lead in the National League West over San Francisco and leads Milwaukee, with a series to play, by the same margin. Up next for the Dodgers is a four-game set at Philadelphia in which they lead the NL East by a game over the Phillies. The Dodgers, of course, are a Southern California institution and have hosted the Brewers before, a little over two years ago. On that occasion, the Brewers beat Los Angeles in three of four games, and the Brewers had the final say on the outcome after winning the finale on a walk-off home run by Ryan Braun. That four-game series in 2006 was the first time the Dodgers had played host to the Brewers, and the NL West-leading Dodgers had won the first three games before going on the road in the finale. The Brewers have never hosted the Dodgers in a four-game set. The Brewers won the first two games of their series with the Dodgers in 2010 at Miller Park, their home park. The Dodgers also defeated the Brewers in Milwaukee on March 28, 2010. The Brewers have a 4 1/2-game lead in the NL Central over the Cardinals and Pirates, and they lead by 1 1/2 games over the Cubs. The Padres have the second-best record in the NL West at 56-55, and the Cubs have the best record at 72-44. The Pirates are 81-49 and trail the Reds by five games in the NL Central. The Giants also have a big lead in the NL West at 4 1/2 games over the Padres. The Dodgers play at Pittsburgh on July 26, and on Sunday they play at St. Louis. The Brewers play at Arizona on July 19. The Dodgers finish the regular season at home against the Phillies on Friday, Aug. 22. The Dodgers open their postseason on Friday, Oct. 3, at Wrigley Field. Q: Rational sum of radical of radicals Is there a better name for the rational sum of radicals? My motivation for this question was wondering if there is a general way to express this kind of sum. Here is what I mean: $\sum_{p,q \in \mathbb{P}} \frac{pq}{p+q}$ Is there a better name for this sum? A: This is Catalan's constant. Catalan's constant is defined as: $\operatorname{Cat} = \sum_{n=0}^{\infty} \frac{1}{(2n)!(n+1)}$. You might be able to guess some of its properties by looking at the Wikipedia article. # see also: You can also use the JavaComm API.

```
java // Create a device and set the appropriate attributes // on the Device. DeviceBase device = commDevice.openDevice(); device.configure(comport, comm_config);
```

 `DeviceBase` is the general base class that serial ports inherit from. `DeviceBase` is abstract and encapsulates low-level communications details. `DeviceBase` includes functions for reading and writing serial data. `DeviceBase` is defined in `ch.java.jComm` Portal Veins The portal venous system consists of two major sections, the splanchnic and the systemic. The splanchnic system is the portion of the portal system that is contained within the body. This system helps to give nutrients to all of the tissues of the body. The splanchnic system consists of blood vessels that carry blood through the intestines and other parts of the digestive tract. It also carries blood from the intestines back into the general circulation via the inferior vena cava, the hepatic portal vein, and the hepatic artery. The systemic system is the portion of the portal venous system that is outside of the body. It contains blood vessels that carry blood into the liver from the inferior vena cava and the renal vein. In addition to the portal vein, the abdominal aorta, right and left renal veins, and the inferior vena
