Bringing Ease to Drawing People are accustomed to working from

---

photographs, but artists' renderings are increasingly popular, because they use the same medium as photography: lines. Many people find it easier to work from life, since hand-drawn art can look more realistic and tends to be less subject to the effects of photography lighting. However, drawing in Photoshop involves mapping the areas of your image that you want to change with the Brush tool, and then painting directly onto your image. You can make

---

a simple black outline of the object, such as a ship, with the Pen tool. The Pen tool (found in the Tools panel) is a rectangle with a thick black line at one end and a curved end that can be set to a radius. You can change the line's thickness with the Pen tool's Size slider. (See the section "The Pen tool: More ways to draw" for more information on the Pen tool.) You can also click and drag the end of the tool to draw a freehand line. You can change

---

the color of your Pen tool by selecting the Brush Preset menu and selecting the color you want to use. Here's how it works: 1. Select Pen from the Tools panel and then click and drag in your image to create your line. 2. Click on the Brush Preset menu at the top of the Tools panel, and choose your desired brush from the menu of choices. 3. Move the selection cursor over the picture and then click to set the color. After you've created your line, you can move, rotate, and

---

size it in the usual fashion. You can also change the color of the line with your Brush tool. Although the Brush tool can be used to add coloring and background to an image, it's more likely to be used for line work for objects or patterns. You can use the Eyedropper tool to select a color in an object or a color from the background and then use the Brush tool to paint that color over a line. The Brush tool is a sampling tool, so when you use the Brush tool to paint

---

colors over lines, you're changing your original line color. Because of this, you may want to change the background color before painting over a line
