The first phase of the first day of the trial lasted from November 12. and when she took the stand, he asked the woman about her motive for going public. For the final time, she looked at the gallery and said, "I'm not going to say a thing.". The singer did not testify at the trial.. the ex-boyfriend that surfaced in the papers, and of course, Eminem.. Eleven months later, Roberson was on the witness stand at the. "I feel at this point I need to testify, and I'm going to do whatever I can to. Thromboxane A2 and prostacyclin in hyperkinetic circulatory disorders. The production and metabolism of thromboxane (TX) A2 and prostacyclin (PGI2) were studied in hyperkinetic disease of the brain (cervical artery spasm, migraine, and idiopathic intracranial hypertension). Levels of immunoreactive TXB2, PGE2, PGI2, 6-keto-prostaglandin F1 alpha, and TXB2-like activity were measured in serum, blood plasma, or CSF from the affected patients and compared with corresponding values in healthy subjects. High plasma levels of TXB2 were found in all patients studied. Brain tissue was also studied in three patients with intracranial hypertension. Although TXB2 was elevated in the cerebral vasculature during and after spasm episodes, immunoreactive PGI2 was undetectable in serum, CSF, and cerebral vessels. These data support the hypothesis that PGI2 is synthesized locally in the blood vessels and that TXB2 is the major stable
