You are Keyla, a young doctor in the island during a pandemic. You are in a small hospital with a few people. A ghostly voice foretells a scary future, in which you will have to choose which of your patients will live and which of them will die. "Mayday" has a very strange start and there will not be another version. Beware of the illness - because there is a deadly pandemic. Save the lives of your patients who have the chance of staying alive. Make the right choices to save them and let them live for the days that are ahead. "Mayday" is a game that is designed to attract the eyes of those who want to explore the concept of video games and artificial intelligence. Story About The Game Mayday: As we all know, the pandemic has hit the world. Soon after the quarantine is lifted, the president announces that he will be the country. Outside the hospital, the streets are on fire. The population is mad, and the chaos is out of control. In the hospital the situation is nearly the same: patients are dying. The rich have servants, the poor have a bit of money. The women and men are slaves of the virus. The black people - the poor - are being treated worse than the white. The children are paying a higher price than the adults: their lives are less valuable and easier to take than the lives of older people. In your time, you will have to make a choice between the lives of your patients in the cold hospital and the jungle fire. Live in the shoes of Keyla, a young doctor in the

island during a pandemic. Choose who lives and who dies in a small peripheral hospital in a pandemic situation. Live in the shoes of Keyla, a young doctor in a pandemic situation. What's new in Mayday: The Survival Island:

Have you ever gone camping and you find yourself in a bad situation? Maybe you were unable to get a fire started, or it rained on you and you were stranded on a beach on a lonely island or something of the sort? Not to worry, there is help out there and it's the survival island! Survival Island is the latest video game created by Kazutoyo Morinaga of Japan (Splosion Man). As you may recall, Backpack Studios was responsible for creating The Awesome Adventures of Captain Spirit. Another Shmup is called Retro Breaker or just Breakers. Word has it that everytime a developer takes an existing game and re-does it, the game gets better. But so does the other game. Now here is a game about a Japanese girl named Mayday as she and her

friends relocate to **The Awesome Adventure of Captian Spirit**. After playing about a month, this game has really grown on me. I like it a lot. But let's get down to the nitty gritty. This is **Mayday** we're talking about. She's a **Knight/Swordsman**. Meaning, she can use weapons which has a long range and she can jump. Well sort of. Jump is actually referring to the infamous double jumps. So we're looking at a class which can jump fast, and takes quite a while to charge up for a massive double jump. It is ok if you're a butterfly though. Perhaps that is why this is a 2 player game (I've always been a solo type of guy). But good thing too as the game really builds with the addition of a second player. And that should be enough to describe **Mayday**. Actually, this is pretty much how I described **Mayday** (She got a Kick). She is truly awesome. **Plot:** In the arid deserts of Egypt, the armies of the evil **Mutatun** are preparing for their assault on the Middle Eastern cities of **Rhodesia**. They are marked by a jewel of immense power: the **Mirrorstone**. Our agent: **Mayday** has a love of showing off and a knack for being clumsy. **Challenges:** Although it's a top down shooter, you have to be able to maneuver through obstacles to complete objectives. But to be blunt, you can't push on obstacles like they're minds. They're nothing. You can run right
