Adobe Photoshop is the foundation for many image-editing programs. Photoshop's base-level work is to translate an image into RGB (red, green, blue) color space. This works by first separating the RGB channels and then reducing each channel's information with its respective pixel value. By making changes to the levels of red, green, and blue (Hue), as well as lightness and contrast (Saturation) you can achieve the same effect in Photoshop, even on raw images. The following are some tutorials to help you get started on your journey to Photoshop mastery: How to Re-scope Canvas Size in Adobe Photoshop The Get Started with Photoshop tutorials have a collection of graphics courses to get you up to speed with Photoshop. Work with Custom Layers A custom layer is an important tool that gives you the power to move parts of your image to different areas of the layers panel and enables you to bring new layers to the foreground. A custom layer gives you the power to work on an image in many different ways. You can change, duplicate, move, fill, or save a layer. Layer Modes, Layer Effects, & Layer Styles The main purpose of layers is to organize an image into elements or sub-images. Photoshop Elements uses a bunch of different layer modes and effects to do exactly that. Use them all, or stick to the ones that suit your needs. You can change the layer modes: Multiply, Screen, Overlay, Soft Light, and Hard Light. Use layer effects to change the style of an image. Use layer styles to add an effect to a layer, like using a drop shadow. A properly presented image can make a difference in the eyes of your audience. Group Layers A group layer is a collection of individual layers that you move as one unit. This will allow you to move an object, or an image, with a single click and does not always show the individual layers. This is a huge time-saver. You can also flatten a group layer to make it single-layer, or turn a group of layers into a regular layer. Brushes Brushes are the building blocks of Photoshop. Brushes can contain color gradients, patterns, and textures, and it is one of the best tools to quickly add details to an image. There are different types of brushes in Photoshop, including: Gradient brushes, which create a gradient 05a79cecff

One hour after the official opening of the new \$158 million John E. O'Neill Sr. Premium Outlets, one of South Florida's largest mall developers has opened a "\$36-million savings community bank" that allows residents to deposit checks and wire money - including its own \$60-million in savings - at no charge. Leaders of the City of Davie welcomed and praised Glenbrook Financial Services Inc., one of the nation's largest "beverage distributors" and owners of J.M. Smucker Co., Kraft Foods, Coca-Cola Co., and Bumble Bee Foods. Thousands of those who lined up before dawn Thursday - at the first John E. O'Neill Jr. Premium Outlets opened 20 years ago - enjoyed their first taste of a new Dallas-based restaurant chain named Texas Roadhouse, which specializes in cowboy-style steaks and burgers. A few minutes after noon Thursday, hundreds of people left the first doors of the new John E. O'Neill Junior Premium Outlets just east of O'Hare International Airport in Rosemont, Ill. For most people, their normal commute to work is pretty straightforward - turn on the radio, head out the door, yell at the kids in the back seat. For serial entrepreneur John E. O'Neill Jr., his drive is a little bit more exciting.Q: Any good third party org web apps for flex - developers beta? Are there any good third party web apps for flex developers that is not a framework, things to do with database etc. I'm a bit lost in the options at the moment and would like any opinion on any that people have come across recently - the closest I can come is flexx grid which has too limited a range for what I want to do. A: Checkout this one from my buddy at Northwind (which seems to focus on cross platform mobile - they have a SDK for Flash and have a couple of iPhone Apps out there... they also have a lot of demos of their stuff out there): And these are some other Northwind Projects: (These seem to be a lot more focused on the Flash and iPhone Apps) If you just want to showcase your business idea, I would recommend A new initiative from Decentral, a leading

Compatibility: Original game will not run on this version. Interface: Interface of my update will be a little different from original game. I will explain more about that in post below. Official game's UI will be translated to GUI of my update by that. Currently, I only translated names of dialogue option and some items. If the dialogue option are displayed in the menu, then it will be displayed on the main screen like original game. Oppo devices have some issues in addition of crashing during update
