## Download

There is no need for those passwords anymore, in case you missed them back then. Luckily, you can just create a new password and continue with your work. Many others have reported that the password they used for NavisworksFreedom2017download has already expired, so this should be no problem for you. In case you forgot your password, you can reset it. If you don't want to bother with the hassle of creating a new password, you can just log in with your user name and password that you used back then. To do that, go to Navisworks > System > Login. Check "Remember password" and "Reset password" if the information you need is saved in a separate file in Navisworks. It should now work! If you still have trouble or want to save some time, please let me know. I am very willing to help you out if you have problems with your NavisworksFreedom2017download.g\$. The first column shows the behavior of the real part and the second column the imaginary part. ![\[fig:fig4\]\] Contour plots of \$\|\psi\_{\frac{PT}{x,y,t}}^2\$ at \$t=0.5\$ and plotted in the \$[0,5]\times[0,5]\$ box to observe the symmetric characteristic of the trapped wave packet. The real and imaginary parts of the function are shown in Fig.\[fig:fig4\] and Fig.\[fig:fig4b\] respectively.](gong\_fig5.eps){\width="8cm"} In order to observe the symmetric character of the wave packet, we plot the contour plots of \$\|\psi\_{\psi}^{TT}(x,y,t)\|^2\$ at \$t=0.5\$ and located in the \$[0,5]\times[0,5]\$ box on the Bloch sphere. The contour plots are shown in Fig.\[fig:fig4\]. It can be seen from the Fig.\[fig:fig4b\] that the wave packet has no projection on the equator and this is the root of the trapping effect. The real and imaginary parts of the function plotted in Fig.\[fig:fig4a\] and Fig.\[fig:fig4b\] show

NavisworksFreedom2017downloadQ: Change the size of an icon when the div becomes larger than a specified size I am trying to change the size of the icon for a div when it becomes larger than a specified size and size down when it becomes smaller. I have tried the following: function enlargeStyle(className, i) { var myDiv = document.getElementByld(className).style; myDiv.width = '50px'; myDiv.height = '40px'; if (myDiv.width > 50) { myDiv.width = '50px'; } Is this the right way of doing it? Or am I not understanding
