But prisoners' anxiety is not allayed. Former inmates fear reprisal, even death, from a predatory government that does not seem as committed to preventing discrimination against sexual minorities as to stopping terror by other means. The monitoring of phone calls, emails and social media after the Sept. 11, 2001, attacks perhaps serves better than ever to show the system's ferociousness. Still, things have improved. In March 2007, a federal judge in California overturned the Fourth Amendment's warrant requirement for searches of government email. In 2011, David Cohen, the director of the F.B.I., said publicly that the agency pursues "the truth," which suggests that the government is closer to acknowledging this than to the recent document-production debacle, where the spurned Democrats called a last-ditch, symbolic suit accusing Mr. Trump of "obstruction of justice," themselves "presidential harassment" and a "mock impeachment" in Trump's words. The F.B.I. investigation of Trump associates' ties to Russia has included no fewer than 100 interviews of current and former members of the Trump campaign, plus an estimated 20,000 documents, including emails and text messages that were obtained by the agency illegally. The F.B.I.'s focus was on a former Trump campaign manager and a foreign policy adviser, among others. Its agents have shown interest in Trump's oldest son, Donald Trump Jr., and his business interests. (The president and his allies have dismissed these as impertinent to the president's legitimate interests as leader of the country.) The evidence they would like has been secured, almost unnoticed by the public. But its privacy, like that of the Obama White House, has been trampled. The F.B.I. also

As China prepares to go to the polls at the end of 2013, the country's bid to host the 2022 Winter Olympics has been overshadowed by an unprecedented number of scandals. But it's that very same chaos that bodes well for the games in the far north. A resurgence in extreme alpine sport, a surge in cultural visitation and the recent, landmark decision to recruit Beijing's first team of professional players could be a form of protest against the erratic leadership of Xi Jinping. The story of the road to Beijing is not one of sporting triumph, but it does highlight the effectiveness of the Chinese state in turning political problems into sporting victories. We will look at the legacy of the games in the games themselves, and what it says about the country's politics. We are publishing a number of previously unpublished features and transcripts of interviews from 20 years ago. We will also be visiting the new facilities which have arisen from China's exertions to host the Games, to capture the story of the infrastructure development that has driven the transformation of the city.
