As a rule, you need to enter the vehicle number. But when you click "Submit" in the browser, the message "Update failed" appears, and that's it. I have tried several sites. And always the same. But when I click "Submit" in the browser, the message "Updating failed" appears. I do not understand anything. I don't want to use third party tools to login to this site because I don't know what that means. How can I access this site using a browser?
